STATE LAND BOARD.

STATE LAND BOARD.

There was somewhat of a wrangle on the subject of the personnel of the state and board. Wesley K. Walton, why is chairman of the Republican state committee, met with the most opposition. Mr. Walton is accredited to Rich county, but for soveral years has lived in this city, and some members of the senate thought that some one should be appointed in Mr. Walton's place who should represent the northern part of the state. After some discussion, in the progress of which Senator Evans said that it was very necessary that the board be continued as at present until its present task of completing the state survey of lands was completed. Mr. Walton's confirmation was put ever until teelay.

A message had been sent to the governor neithying him of the rejection of the names of W. W. Riter and James Sharp as university regents, and asking him to send in other nominees. His excellency sent back a very diplomatic note, stating that he would like to be informed as to all the nominees rejected before he made any new appolatments.

The communication was laid upon the lable, and then, upon motion of Senators Peery, the executive session concluded and then separators had bound in themselves by the most rigid oaths to reveal mothing of what had transpired, and they were mum as the proverbial syster when appreached for news as to what had been accomplished. As news will, however, the news of what had been done in this executive session had already leaked out.

OF PARLEY'S CREEK

Owners There Should Bought Out If a Reasonable Price Can Accomplish It—Defects In the System of Distributing Water Here.

St. Louis, March 14.—An adjourned meeting of the Western Passenger association is in session at the Southern hotel, with B. D. Caidwell in the chair. There are a number of subjects on the docket for consideration. Most of these are the large gatherings which will take place this spring and summer, and for which reduced fares are asked Perhaps the most important matter bengage the attention of the members is the 45° rate to Portland recently made by the Northern Pacific, which is likely to cause disruption of California rates. City Engineer Kelsey submitted to the city council last evening several mportant reports relating to the water system of the city. One highly interesting one refers to the cost of making ertain faprovements in the water distributing system. Another relates to the water of Parley's creek, which the Will Extend a Newly Absorbed Line

the water of Parley's creek, which the city engineer says is unlit to be used for domestic purposes, as shown by careful analysis.

With regard to Parley's creek, a portion of the report says:

"The number of people living in the canyon above the head of the city's conduit is about 100, and, with but one or two exceptions, the burns, corrais and out-houses are located where the canyon is narrow, and within 100 feet of the stream. In a number of places the stables are located right on the bank of the creek, and for convenience in watering stock, the corrais extend across it. The corrais and stables in most cases are in a fifthy condition, and the drainage flows directly into the stream. The number of head of stock kept in this canyon runs from elshiy to 150.

"There are from 400 to 600 acres of

A number of railroad and board of trade men testified. On behalf of the railroads it was urged that the low rates from Iowa were that the low rates from Iowa were clear that the low rates from Iowa were recessary for the railroads to get business. The board of trade men said the discrimination prevented them from shipping grain for export, and that the levators were filled with grain, awaiting the opening of navigation, before they could compete with the Iowa points.

He then points out the duties of the watermaster, who under the ordinance is required to keep a record of all dams, flumes, ditches, canals, the proportion of water to be drawn, etc., and then closes:

"There are no records kept as required by this ordinance, and one of the city's most important water right contracts is missing.
"In view of these facts the city should bring suit to quiet the title to the water of Parisy's creek, and when its rights are determined, see to it that they are not infringed upon."
